

Wallbridge Mining Company Limited is focused on creating value through the exploration and sustainable development of gold projects along the Detour-Fenelon Gold Trend while respecting the environment and communities where it operates.

Wallbridge's flagship project, Fenelon Gold, is located on the highly prospective Detour-Fenelon Gold Trend Property in Quebec's Northern Abitibi region. A mineral resource estimate completed in 2023 validated the multi-million-ounce potential of the 100%-owned Fenelon and Martiniere properties, incorporating a combined 3.05 million ounces of indicated gold resources and 2.35 million ounces of inferred gold resources

Reporting to the HSE Manager with support to Corporate, responsible for the overall coordination of the site compliance monitoring program including the planning and execution of the sampling program, data management and interpretation and compliance reporting according to Directive 019 and other regulations (effluents, potable water, forestry, waste, wildlife, spills).
